

VERBOT'S™ SECRET

We would like to share a secret with you...

The key to success in making Verbot work is:

- When you program Verbot, vary your **tone** of voice and **inflection** for each command. In other words, ***it is not what you say, but rather HOW you say it.***
- Your command can not be longer than 1.2 seconds or Verbot will erase it.
- When you repeat your commands, use the same voice tone and inflection as you programmed them.

Please read the Instruction Manual carefully, paying close attention to page 10. Remember, practice makes perfect!
