Installing or changing batteries in the Lite Wand
The Lite Sprites Lite Wand requires 4 x “AAA” alkaline batteries (not included).

1. Open the battery compartment using a Phillips screwdriver (not included) to remove the screws on the battery compartment cover.
2. Insert the batteries. Ensure that the positive and negative polarities match the illustrations inside the battery compartment.

Color Library

Overview
When you turn on the Lite Wand, you will be in the Color Library.

The Color Library includes 10 built-in colors for you to share with Lite Sprites and all of Lite-Topia.

The current color will glow in the Orb. The next two available colors in the Color Library will appear in the two Color Displays below the Orb.

Choosing and adding colors
Press the Diamond button on the Lite Wand to cycle through the colors you can share.

You can also collect and add about 50 new colors to the Color Library!

To add a new color when you are in the Color Library, press the Color Collector onto a colorful flat surface, like a piece of paper.

When you turn off the Lite Wand, the Color Library resets to the 10 built-in colors. This lets you add new colors each time you play.

Sharing color
The Lite Wand can share color from up to 6-7 feet (2 meters) away.

To share a color, press and hold the Diamond button on the Lite Wand for about 2 seconds and aim the wand at Prisma or another Lite Sprite (as shown in the illustration to the left), a Lite-Topia playset or another Lite Wand in Color Library mode.

Sleep mode
If you do not interact with the Color Library for about 1 minute, the Lite Wand will play a bubble sound and cycle through the colors in the Color Library. After another minute without interaction, the Lite Wand will play a chime sound and go to sleep.

You can wake up the Lite Wand by pressing the Diamond or Magic button.

To conserve batteries, turn off the Lite Wand when not playing with it.
Note: In Games and Spells mode, the Lite Wand will enter Sleep mode after about 2 minutes without activity.
Games and Spells
Press the Magic button to cycle through the Lite Wand menu and to select a game or a color spell.

Games

Color Hunt
How many colors can you find before time runs out? Use the Color Collector to collect each color that glows in the Lite Wand’s Orb.

Color Mix
What do you get when you mix two different colors together? Watch two colors flash slowly in the Orb and Color Displays. Then use the Color Collector to collect the color they create when combined.

Color Spells
There are 5 built-in color spells that you can share: 3 World Spells that affect the Lite Sprites and Lite-Topia playsets and 2 Bleak Spells that only affect Bleak*.

Press the Magic button to cycle through the Lite Wand menu and to choose World Spells or Bleak Spells. Once you have chosen World Spells or Bleak Spells, press the Diamond button to cycle through the built-in color spells and to share them.

World Spells
- Cold Spell (blue, blue, white): Brrr, it’s getting chilly in Lite-Topia. Lite Sprites and playsets will fade between blue and white.
- Heat Wave (red, orange, white): Lite-Topia is heating up. Lite Sprites and playsets will turn red and then flash red and orange.
- Nighty Night (purple, blue, blue): Lite Sprites and playsets will dim slowly until they turn off, just like a nightlight.

Bleak Spells
To unlock Bleak and allow her to share color like her sister Sprites, cast the Free Bleak color spell with your Lite Wand. All other Bleak Spells will only work when Bleak is still locked.

- Free Bleak (pink, purple, green): Free Bleak from her colorless world.
- Color Bleak (red, blue, green): Add a little color to Bleak.

Sharing spells
To share a chosen spell with Bleak, another Lite Sprite or a playset, aim the Lite Wand and press and hold the Diamond button for about 2 seconds.

Breaking spells
There are two ways to break a spell in a Lite Sprite or playset: 1) share a different spell or 2) share a color from the Color Library. The Lite Sprite or playset will then return to its original setting.

Troubleshooting

Q. The Lite Wand will not collect color from some objects.
A. The Lite Wand cannot collect color from objects with a reflective surface, like a computer monitor or shiny plastics, or from surfaces that are not flat, like a ball.

Q. I used the Lite Wand to share a color, but my Lite Sprite or playset did not change to that color.
A. The Lite Wand has a range of about 6-7 feet (about 2 meters), and if you try to share a color from farther away, it might not register.
Make sure your Lite Wand is aimed at the Lite Sprite or playset whose color you want to change or it might not register.
Using the Lite Wand in direct sunlight can also affect its ability to share colors.

Q. I tried to share color between my Lite Sprites, but they did not change color.
A. Lite Sprites have a range of about 3 feet (1 meter), and if you try to share a color from farther away, it might not register.

Q. I tried to collect a color from an object, but the Lite Wand displayed a different color.
A. When collecting colors from objects, the Lite Wand might interpret them differently from how you view them. For greater accuracy when collecting your desired color, choose a vibrant shade of that color. If the Lite Wand does not recognize a particular shade, choose another shade of the color.

Note: If the Lite Wand is consistently having difficulties recognizing colors, the batteries might need to be changed.
